FLORKIN -

My dear Colleague,

During the Symposium of COSPAR in Florence (12-16 May 1964) there will be two meetings of individual communications on extra-terrestrial life or on terrestrial life in space. Would you not be kind enough to suggest speakers for these communication meetings ?

On the other hand, among the review papers, there will be one on Satellite biological experiments. Problems to be treated.

by an American

and one on idem. Results obtained so far.

by a Russian

Two scientists from countries other than the USSR and the USA should be invited to discuss these review papers, and I should like to have your advice on this matter.

Yours sincerely,

Marcel Florkin

COSPAR
